

Certificate of Analysis

Description: Purified RNA, HIV-1 Group M, Subtype G

Isolate ID: BCF-KITA
Country of Origin: Zaire
Phenotype: Non-Syncytium Inducing
Source: NED Panel (NIH-ENVA-DOD); an International HIV-I Subtype Reference and Standards Panel.
Sequence Homology to NED Panel Seed stock: 100%
Reference: AIDS Research and Human Retroviruses, 2003:19:4 pp321-328
Viral Culture: The virus from which the RNA was extracted was propagated in PBMCs with RPMI-1640 w/L-glutamine, 10 % fetal bovine serum, Gentamicin and interleukin-2.

GenBank Sequence Availability:

Sequence:	Accession Number(s)
pol	AF447852

Catalog Number: 0400-0089

Lot Number: 12091

Volume: 1mL Aliquots

Manufacture Date: 21Sep2009

Storage Temperature: -70 °C

RNA Titer: 6.50E+08 RNA copies/mL (Roche AMPLICOR® HIV-1 Monitor™ Assay, v. 1.5)

Safety Precautions: Use Universal Precautions when handling this material.

Intended Use: For Research Use Only. Not for use in Diagnostics Procedures

Approval:
