**PART Code** 5810-0024 (24-00-02)  
**Lot No.** 10362122  
**SIZE** 40 blots

**DESCRIPTION** Product is for the detection and visualization of recombinant proteins containing polyhistidine sequences immobilized on membranes via electrophoresis or dot blotting. Detection is carried out through a horseradish peroxidase (HRP) labeled nickel conjugate which binds with high affinity to polyhistidine sequences. Visualization is facilitated through the reaction of HRP with a luminol substrate resulting in photon (light) emission.
