KPL HisDetector™ Western Blot Kit, AP Colorimetric

PART CODE: 5810-0025 (25-00-01)
LOT NUMBER: 10691957
SIZE 40 Blots

DESCRIPTION: Product is for the detection and visualization of recombinant proteins containing polyhistidine sequences immobilized on membranes via electrophoresis or dot blotting. Detection is carried out through an alkaline phosphatase (AP) labeled nickel conjugate which binds with high affinity to polyhistidine sequences. Visualization is facilitated through the reaction of AP with 5-bromo-4-chloro-3-indoxyl-phosphate (BCIP) and nitroblue tetrazolium (NBT) substrate resulting in a dark purple precipitate.

FORM/STORAGE: Kit contains reagents in liquid form. Store at 2-8°C.
